Soft Skills

Adaptability
Time Management
Teamwork Problem Solving

Preeti Jha

Full Stack Web Developer

Professional Summary

Dynamic Full Stack Web Developer with expertise in HTML, CSS, and foundational programming languages. Adept at learning new technologies and utilizing Generative AI to enhance development processes. Proven experience in collaborative environments and committed to creating scalable, efficient applications using the MERN stack.

Projects

Employee Management System	Live Demo Link	Github Repo Link
----------------------------	--------------------------------	----------------------------------

JavaScript React CSS3 Git

- Built a user-friendly frontend web application using React.js for managing employee data efficiently.
- Designed features for adding, updating, and deleting employee information, along with a search and filter capability.
- Implemented responsive design using CSS to ensure seamless user experience across various devices.
- Used Git for version control and collaborated with team members for regular updates.
- Participated in code reviews and debugging to ensure application stability and reliability.

Quiz App	Live Demo Link	Github Repo Link
----------	--------------------------------	----------------------------------

JavaScript React HTML5 Git CSS

- Developed user-friendly front-end components of the Quiz App using React.js to ensure engaging user interaction.
- Implemented dynamic question and answer handling logic with real-time feedback on correctness.
- Utilized localStorage for persistent leaderboard functionality, retaining player scores after page refresh.
- Optimized the application's performance and responsiveness, enhancing the user experience across devices.
- Collaborated using Git for version control to manage code iterations and ensure code quality.
